

Amendments to the Specification

The paragraph starting at page 7, line 20 and ending at line 25 has been amended as follows.

Moreover, in addition to the above-described embodiment as a printing apparatus, the present invention can also be achieved in embodiments such as a power supply control method in a printing apparatus, a computer program that implements such method on a computer, and a storage medium storing such a computer program.

The paragraph starting at page 13, line 25 and ending at page 14, line 5 has been amended as follows.

It should be noted that, although the present embodiment is described in terms of the 6 colors of ink described above, the present invention is not limited to the use of these 6 colors. Thus, for example, an inkjet printer that uses the 4 colors, black, cyan, magenta and yellow, to carry out printing can achieve the present invention. In this case, 4 separate ink tanks for each of the 4 colors may each be detachably attached to the printhead
